

World's Lost Tribes

10pm, Discovery

Is there a lost tribe that doesn't have at least one intrepid explorer type living among them, eating their witchetty grubs, ruining their hunts and borrowing their penis gourds? After Bruce Parry's splendid forays with Tribe, Mark Antice and Olly Steeds shed the shackles of western civilisation, and their clothes, to make a nuisance of themselves among the Kombai in West Papua. Or, as narrator Fiona Bruce puts it, try to "prise open the storehouse of ancient Kombai knowledge".
